

SEMI-ANNUAL STATUS REPORT OF THE CANADIAN NUCLEAR

FUEL WASTE MANAGEMENT PROGRAM

1988 October 1 - 1989 March 31

Compiled by

E.D. Wright

ABSTRACT

This report is the sixth in a series of semi-annual status reports on the research and development program for the safe management and disposal of Canada's nuclear fuel waste. It describes the progress achieved in the three major subprograms, engineered systems, natural systems and performance assessment, from 1988 October 1 to 1989 March 31. It also gives a brief description of the activities being carried out in preparation for the public and governmental review of the disposal concept.
