

SEMI-ANNUAL STATUS REPORT OF THE CANADIAN NUCLEAR

FUEL WASTE MANAGEMENT PROGRAM

1989 April 1 - September 30

Compiled by

E.D. Wright

ABSTRACT,

This report is the seventh in a series of semi-annual status reports on the research and development program for the safe management and disposal of Canada's nuclear fuel waste. It describes the progress achieved in the three major subprograms, engineered systems, natural systems and performance assessment, from 1989 April 1 to September 30. It also gives a brief description of the activities being carried out in preparation for the public and governmental review of the disposal concept.
